Fazer a codificação das primeiras classes: Aeroporto, ControladorVooProgramado, VooProgramado. E implementar suas respectivas funções.

Iniciar a interface juntamente com as classes iniciais.

CODIFICAÇÃO

☒ Aeroporto

☒ ControladorVooProgramado

☒ VooProgramado

☒ Interface

@becelli Ir marcando cada classe assim que for feito

Lista de defeitos:

Funcionalidade: Cadastrar um voo.

Defeito	Requisito	Classe	Descrição
1	4	FI	O sistema não permite que voo de origens diferente sejam cadastrados dentro de um período de 30 minutos. A limitação de 30 minutos deveria se aplicar somente a voos de mesma origem.
2	-	FI	O sistema permite que voos de mesma origem e destino sejam cadastrados.
